

# Colloquium

**ACM Local Chapter, Computer Science Department, Oklahoma State University**

## **Jessica Steffy**

Sandia National Laboratories (SNL)

<http://www.sandia.gov/>

**3-4pm, Thursday, Mar 31, 2011**

**Location: MSCS 310**

## **Abstract**

Sandia National Laboratories (SNL), a multi-program engineering, science, and national security laboratory, will be hosting a talk to discuss the opportunities at SNL for computer scientists. The talk will include an overview of the Labs, a description of a current software project and the development methodology being used, as well as the various benefits of working at SNL, including information about the main work locations - Albuquerque, NM and Livermore, CA.

## **About the Speaker**

The talk will be given by Jessica Steffy, an OSU alum. Jessica graduated from OSU with a BS in Mathematics in 2004 and later earned an MS in Computer Science from The University of Tulsa in 2008. She joined SNL in July 2010 and is currently working on new developments and improvements to the Integrated Laboratory Management System, the framework by which Sandia manages all work done at the Labs.

\*\*\*REFRESHMENTS will be provided\*\*\*
